

Technological progress for the period
October 22, 2019 to November 7, 2019

The last few weeks the developers' team was focused on development of the mobile app, and it has brought the results: on October 27 the alpha version of the mobile app in Google Play was updated

The focus group has already received the access to the alpha versions of the Roobee mobile apps in stores and is actively engaged in testing. We are receiving their feedback on the app.

Read all the details on the development process with screenshots in the fortnight developers' report

The graphic features a blue gradient background. At the top left is the 'roobee' logo in white. To its right is an illustration of two smartphones displaying the app interface. Below the logo is the title 'Technical summary from the development team' in white. The main content consists of four white rounded rectangles, each with a colored dot and a bold text description. At the bottom, a small line of text provides a disclaimer about the alpha phase of the application.

roobee
