# roobee

Technological progress for the period
September 9, 2019 — September 24, 2019

Over the past two weeks, we have completed the tasks for developing a mobile application, and progress is quickly turning into real results.

The main focus was on the development of a mobile application, and the upcoming beta-release on Google Play. A lot of work has also been done on the web version of the Roobee platform.

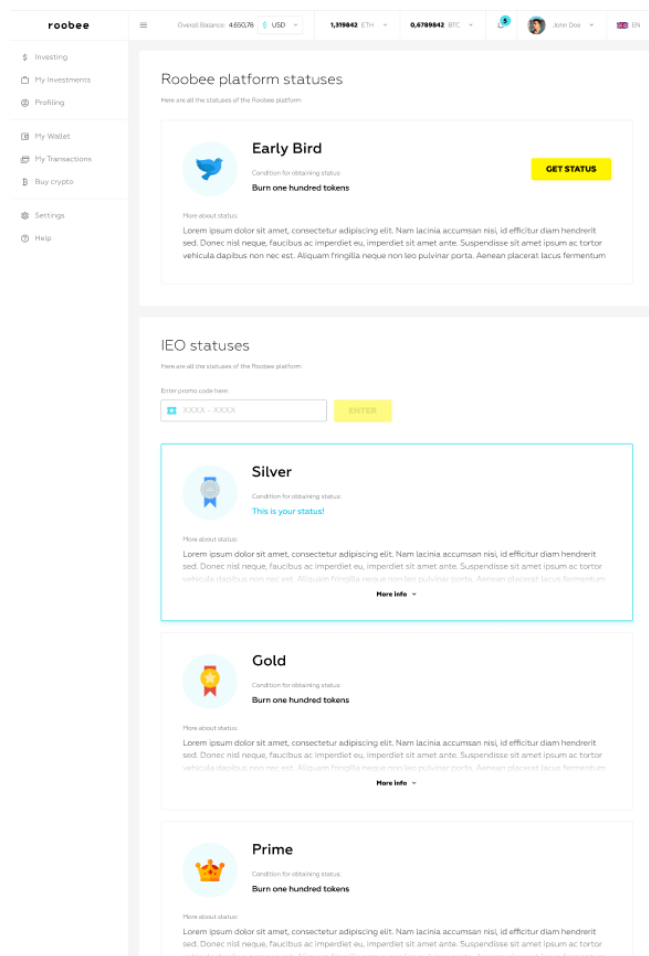

From the report you will learn:

- technological process for the last two weeks;
- bug fixes on the Roobee platform;
- The current focus of development.

Technological progress for the period September 9, 2019 — September 24, 2019

Web version:

- Work has been done on the section with statuses, now all statuses are displayed in one window.
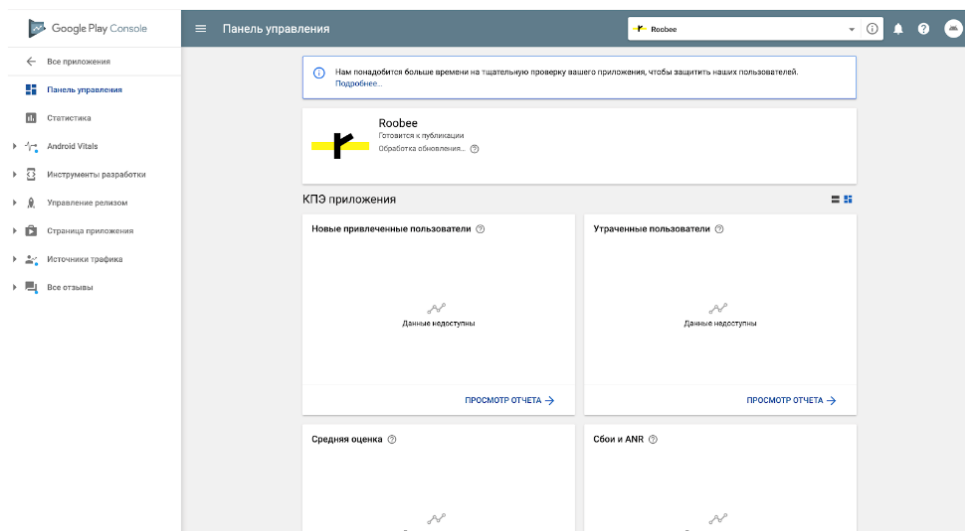

- Work has been done on the user's risk-profiling section. Now everything is displayed in one window.
